

# Shuo Han

Email: shuohan2024.1@u.northwestern.edu | Address: Evanston, IL

## Education Background

Northwestern University	2022.09 – 2024.08
<ul style="list-style-type: none"><li>Master of Science in Statistics and Data Science</li></ul>	
Boston University	2019.09 – 2022.08
<ul style="list-style-type: none"><li>Bachelor of Arts in Computer Science and Statistics</li><li>Awards: Dean’s List</li></ul>	

## Research Interests

*Trustworthiness, reasoning, and domain-specific applications of Large Language Models (LLMs), with a focus on addressing reliability concerns and enhancing reasoning and generative capabilities for coding tasks.*

## Publication

- Zelei Cheng, Xian Wu, Jihao Yu, **Shuo Han**, Xin-Qiang Cai, Xinyu Xing., “Soft-Label Integration for Robust Toxicity Classification”, NeurIPS, 2024
- Shuo Han.**, “Hydro-GRNNI: Hydrological Graph Recurrent Neural Network for Imputation”, Northwestern University, 2024
- Chenli Wang, Juyang Wu, Xing Yang, Junfei Wang, Jian Shu, Jiazhong Lu, Yuanyuan Huang, **Shuo Han.**, “MC-GAN: an Adversarial Sample Defense Algorithm”, ICCWAMTIP, 2024
- Jian Shu, Bo Xian, Chenli Wang, Jiazhong Lu, Yuanyuan Huang, **Shuo Han.**, “A Botnet Data Collection Method for Industrial Internet”, ICCWAMTIP, 2024

## Research Experiences

Research Assistant in Trustworthy LLMs	2024.05 – Present
University of New South Wales	
<ul style="list-style-type: none"><li>Design experiments to test the robustness and uncertainty of LLM responses for cybersecurity tasks.</li><li>Develop an automated evaluation framework to assess LLMs' reliability in identifying and reasoning about security-related bugs.</li></ul>	
Research in AI for Security	2023.12 – 2024.05
Northwestern University	
Project Background: Toxicity detection in human-LLM interactions often relies on single-annotator labels that can be biased, so we aim to use crowdsourced labels for more balanced and accurate assessments.	
<ul style="list-style-type: none"><li>Crafted toxic prompts using prompt engineering techniques and annotated them through third-party companies and LLMs. Integrate these crowdsourced annotations using a soft-labeling technique.</li><li>Incorporated a bi-level optimization algorithm and GroupDRO loss based on topics to compute out-of-distribution loss, addressing distribution shifts caused by variations in annotators and topic difficulties.</li></ul>	
Research Assistant in Data Mining	2023.07-2024.08
Northwestern University	
Project Background: The sparsity of U.S. hydrological data impedes effective assessment. To overcome this challenge, we explored using graph neural networks to impute missing data through spatiotemporal dependencies.	
<ul style="list-style-type: none"><li>Designed the model to capture upstream-downstream information among all monitoring stations, rather than relying solely on general latitude and longitude data, to better suit hydrological data.</li><li>Use Graph Recurrent Neural Networks to capture spatial and temporal information, leveraging the recurrent structure for temporal data and the graph structure for spatial dependencies.</li></ul>	
Research Assistant in AI Security	2023.05-2023.08
Advanced Cryptography and System Security Key Laboratory	
<ul style="list-style-type: none"><li>Explored applying model compression techniques to enhance the model structure, achieving lower computational costs and improved accuracy for Generative Adversarial Networks.</li></ul>	

- Proposed a data collection method for the industrial internet that includes network traffic and industrial control features, enhancing the accuracy of botnet detection.
- Applied a Logistic Regression approach for botnet detection on the collected dataset, addressing both binary classification and multiclassification tasks.

## Academic Services

---

### Graduate Teaching Assistant

Northwestern University

Primary responsibilities: Host office hours, grade assignments, and lead project presentation sessions.

- STAT 332-0/IBIS 432, Spring 2023, Class size:30
- STAT 303-2, Winter 2023, Class size: 100

### Volunteer

- The Seventeenth International Conference on Web Search and Data Mining, 2024

## Skills

---

- Languages: Mandarin (native), English, Korean Beginner, Japanese Beginner
- Software: Adobe Illustrator, MS OFFICE
- Programming language: Python, Java, C, R, SQL, CSS, HTML, Java Script, OCaml
- Framework/Technology: Pytorch, Tensorflow, Linux, Git, HuggingFace, Pandas, Numpy, Matplotlib
